EXPERIENCE

Full Stack Web Developer Intern

at Splendore Digital

June 2023 - January 2024

- I led the development of a CRM system used in managing the sales of Unopar courses in the region, serving hundreds of students.
 - Responsible for gathering requirements, project design, and selecting the technology stack..
 - I worked on implementing various routes and business logic for a REST API, as well as developing interfaces and features in the front-end.
 - I carried out the restructuring and modularization of the back-end, standardizing the organization of project folders and files, enhancing the Developer Experience.

Tags: React, Express, Node, TypeScript, MongoDB, Tailwind, API REST, Docker, Prisma, Zustand, Git, GitHub, Postman.

Full Stack Web Developer Intern

at PrestContas

June 2022 - January 2023

- I participated in the creation of an asset management system used by several city governments in the region.
 - Implemented various features in the front-end using JavaScript and jQuery
 - I was responsible for making the main interfaces of the system responsive, using HTML, CSS, and Bootstrap.
 - Worked on developing the system's API routes using Django.
 - Worked on structuring the MySQL database of the project.

Tags: Django, Python, HTML, CSS, JavaScript, jQuery, MySQL, API, Responsividade, XP, Git, GitHub.

PROJECTS

Pet Solidário:

- Platform for animal adoption developed during the Software Engineering and Project Management classes.
 - Responsible for choosing the technology stack used in the project.
 - Applied concepts of CI/CD and the SCRUM methodology in practice.
 - Implemented front-end interfaces using React and Tailwind.
 - Developed an API using Express.
 - Created the database with MongoDB, with a local instance for the development environment and an instance on Atlas for production.

Tags: React, Express, Node, JavaScript, Tailwind, MongoDB, Atlas, Git, GitHub, CI/CD, SCRUM
