Languages: English - Advanced / Portuguese - Native

EXPERIENCE

Full Stack Web Developer Intern
at Telcomanager
June 2024 - November 2024

- I work on the development and maintenance of a network monitoring and management system, used by operators such as TIM and Claro.
  - Responsible for the implementation and documentation of more than 40 endpoints in the back-end, implementing the logic and data processing for each route and building the queries.
  - I implemented a feature for generating network connection reports, enabling better analysis of the network by users.
  - I work continuously on solving bugs and improving the system, mainly focusing on user interfaces, being responsible for styling the system's login screen.

Tags: JavaScript, Python, React, Redux, Flask, PostgreSQL, Docker, Unix, REST API, Apache Druid, MkDocs.

Full Stack Web Developer Intern
at Splendore Digital
June 2023 - January 2024

- I led the development of a CRM system, used to manage sales of Unopar courses in the region, serving hundreds of students.
  - In charge of gathering requirements, project design and choosing the technology stack to be used.
  - I worked on implementing several routes and business logic for a REST API, in addition to developing the interfaces and features present in the front-end.
  - I redesigned and modularized the back-end, standardizing the organization of project folders and files, improving the Developer Experience.

Tags: React, Express, Node, TypeScript, MongoDB, Tailwind, REST API, Docker, Prisma.

Full Stack Web Developer Intern
at PrestContas
June 2022 - January 2023

- I participated in the creation of an asset management system used by several city governments in the region.
  - Implemented various features in the front-end using JavaScript and jQuery.
  - I was responsible for making the main interfaces of the system responsive, using HTML, CSS, and Bootstrap.
  - Worked on developing the system's API routes using Django.
  - Worked on structuring the MySQL database of the project.
